PRODUCTS

ABOUT US

SENOL REFRIGERATION; who has been developing rapidly since 1975, founded in Istanbul. It continues its facilities with new investments up to present on 22.000 m² land in Tekirdağ factory. Following the advanced high technology closely both inside and outside Turkey and by manufacturing products in international standards; the main goal of Senol Refrigeration is to ensure absolute customer satisfaction. For this purpose; the company expands its product range with R&D activities and serves a 24/7 technical services with its expert technicians.

In globalized market, Senol Refrigeration carries on its activities with dynamic staff based on customer satisfaction and aims to be one of the promising companies in refrigeration market. The company provides professional solutions upon customer needs and desires. In addition to the domestic market, the company exports its products to more than 60 countries. Senol Refrigeration draws attention to its safe and qualified goods for its internationally approved product and quality certificates. Main products are patisserie and supermarket cabinets, cold storage panels, condensing units, central cooling systems, air cooled chiller units and industrial kitchen equipments.

Senol Refrigeration is in the sector for 50 years and growing every day by expanding its product range and customer network.

Central Cooling Systems

Merkezi Sistem
Soğutma Grupları

Get Beyond The Cooling Limits

Soğutmanın Sınırlarını Zorlayın

30-35% energy saving.

- Central cooling units, which enable low initial investment costs, are produced in various capacities as positive and negative groups according to customer needs.
- High cooling performance, wide capacity range.
- Cooling durability.
- Space saving.
- Easy installation, maintenance and service.
- Easy programming for required values.
- Monitoring and controlling from main terminal by connecting to central automation systems.
- Closed framed models have an electrostatic powder painted and decorative main body that is resistant to weather conditions.

enerjide %30-35 tasarruf.

- Düşük ilk yatırım maliyetleri sağlayan merkezi soğutma grupları, pozitif ve negatif gruplar olarak müşteri ihtiyacına uygun kapasitelerde üretilmektedir.
- Yüksek soğutma performansı, geniş kapasite aralığı.
- Soğutmada süreklilik.
- Minimum yer işgali.
- Montaj, bakım ve servis kolaylığı.
- İstenilen değerlere kolayca programlanabilme.
- Merkezi otomasyon sistemlerine bağlanarak bir merkezden izlenme ve kontrol edilebilme.
- Kabinli modellerde cihaz gövdesi; dış hava şartlarına dayanıklı, elektrostatik toz boyalı ve dekoratif görünümlüdür.

Air Cooled Chiller Units

Hava Soğutmalı Chiller Üniteleri

Meet Advanced Technology!

Üstün Teknolojimizle Tanışın!

High efficiency

- Compatible to open / closed water cycles
- Screw compressors
- Electronic expansion valves
- Lockable control board
- LED signals showing refrigeration system
- Works between +5°C / +15°C
- Condensation is assumed as + 45 °C / +57°C
- Condensers resistant to high temperatures
- Superheat control
- 4-Stage capacity control system
- Sensible automation (consumes energy according to requirement)
- Oil level control
- Records failure and service times
- Alarm system

Yüksek verimlilik

- Açık ve kapalı su devrelerine uygun
- Vidalı kompresörler
- Elektronik genişleme valfleri
- Kilitli kumanda panosu
- Soğutma sistemini gösteren LED ışıklı sinyaller
- +5°C / +15°C soğutma şartlarına uygun
- Kondenzasyon sıcaklığı +45°C / +57°C
- Yüksek ısıya dayanıklı kondenser seçimi
- Superheat (aşırı ısınma) kontrolü
- 4 Zamanlı kapasite kontrol sistemi
- Akıllı otomasyon (ihtiyaca kadar enerji harcama)
- Yağ seviye kontrolü
- Arıza ve servis zamanlarını kaydetme
- Alarm sistemi
